UXORI OPTIMAE

## Acknowledgments

My debts in completing this study of Fabretti's *De aquis* are many and varied. First, I am greatly indebted to the Library of the American Academy in Rome, where most of the research was done, and to its ever helpful staff, as well as to the indispensable Biblioteca Apostolica Vaticana with its incomparable collection of books and manuscripts, most important among them for my study being the 1788 Barbiellini edition of Fabretti's text. I am most grateful to the administration of the Vatican Library for kindly permitting me to reproduce Fabretti's map of the Roman Campagna, as well as to the Beinecke Rare Book and Manuscript Library at Yale University for permission to photograph and reproduce the other figures from the original edition of 1680.

Fordham University generously supported my work through a Faculty Fellowship during the 1996–97 academic year, a reduction in teaching load in the spring of 1999, and several grants to offset travel and research expenses. I am indeed grateful to my home institution for this commitment to scholarly research.

Many scholars and colleagues on both sides of the Atlantic have also been most helpful. Robert Rodgers very kindly made available to me the text and commentary of his forthcoming edition of Frontinus's *De aquaeductu*; aqueduct hunters all over the world have been eagerly awaiting its publication, and it was a tremendous help to have a sneak preview of it. In addition, I am greatly indebted to Giovanna Tedeschi Grisanti, who

encouraged me in this undertaking some six years ago; to Lorenzo Quilici, who generously shared with me his extensive knowledge of both Rome's aqueduct system and Fabretti's topographical stomping grounds; and to the readers for the University of Michigan Press and my expert copy editor Jill Butler Wilson, who caught many infelicities and errors in the manuscript I submitted. Of course, I take full responsibility for the mistakes that remain.

After this book had already gone to page proof, Christer Bruun very kindly made available to me a copy of a recently published article directly relevant to my study, "Frontinus, Pope Paul V, and the Aqua Alsietina/Traiana Confusion," *BSR* 69 (2001): 299–315. I am happy to say that we are in substantial agreement about the seventeenth-century confusion Fabretti attempted to clarify in his first dissertation, and it is a pleasure to acknowledge this assistance, one more example of the valuable help I have received from colleagues in completing this work.

My greatest debt is to my wonderful wife, Fran, to whom this book is lovingly dedicated. Although hardly an ardent fan of aqueduct hunting, she has kindly put up with one. In addition, as an expert editor, she read through my final draft, catching all sorts of embarrassing mistakes and improving my translation and prose style at many points. Her affectionate help and support in bringing this project to its conclusion mean more to me than I can say.

## Contents

Figures	xi
Abbreviations	xiii
Introduction	i
<i>Chapter One</i>	
Fabretti the Aqueduct Hunter	4
<i>Chapter Two</i>	
Fabretti's <i>De aquis</i>	10
<i>Chapter Three</i>	
Dissertation I on the Waters and Aqueducts of Ancient Rome	19
<i>Chapter Four</i>	
Dissertation II on the Waters and Aqueducts of Ancient Rome	101
<i>Chapter Five</i>	
Dissertation III on the Waters and Aqueducts of Ancient Rome	185
<i>Chapter Six</i>	
Conclusion	268
Works Cited	281
