"*Greenland in Arctic Security* makes a substantial empirical contribution to Arctic regional studies as an up-to-date and theoretically nuanced account of Greenland's security politics. The focus on Greenland as a polity results in an important effort in IR theorizing to move beyond the prevalent European and North American cases upon which many IR concepts are built. This volume will be of interest to scholars and students of politics and security in the Arctic and beyond."

## GREENLAND IN ARCTIC SECURITY

(DE)SECURITIZATION DYNAMICS UNDER CLIMATIC THAW AND GEOPOLITICAL FREEZE

Marc Jacobsen, Ulrik Pram Gad, and Ole Wæver

Greenland has increasingly captivated imaginations around the globe. Yet, while it is central to the Arctic region, its role has been poorly understood. *Greenland in Arctic Security* delivers a comprehensive overview of how security dynamics unfold in and in relation to Greenland. Each individual chapter analyzes specific discourses and dynamics pertaining to hard or soft security questions. These span from great power interests in geostrategic infrastructure to domestic debates centered on promoting and protecting Greenland identity when engaging with the outside world. In addition, the book offers perspectives on other security questions that have been catalyzed by the effects of climate change.

By combining these different analyses, *Greenland in Arctic Security* provides new, theoretically informed discussions on how security politics can manifest across different scales and territorial borders. At times, these politics can have consequences beyond their original intent. With Greenland geopolitics and securitization theory of current interest to political and academic debates, this book offers timely insights for readers.
