This list contains the vocabulary in *Intermediate Reading Practices* that is probably new for a student at this level of proficiency. The vocabulary is listed alphabetically for each of the eight lessons in the book.

A good number of the words here are from the Academic Word List, the University Word List, or the General Service List. Multiple forms of a word (e.g., *injure, injured, an injury*) are given when those forms are useful for communication or frequent in usage. Words in bold appear on the Academic Word List (see page xii for more information).

Because of individual differences in vocabulary knowledge and cognate recognition depending on the learner’s native language, the amount of vocabulary that is new for each student may vary considerably. It is also important to note that research shows that knowing one form of a word does not in any way indicate that students are likely to know all or even most of the forms of a word. In other words, even though the forms may look very similar (e.g., *injure* and *injury*), it is important for learners to see the and practice these different forms.
