

General Index

This index is based primarily upon the discussions in the various sections of the volume that present the different categories and classes of votive terracottas from the sanctuary at Santa Venera. The catalogues of terracottas following these discussions have received limited indexing since most subjects of significance are mentioned in the discussion that introduces each catalogue section. In addition, the discussion usually makes specific reference to relevant terracottas by catalogue number. As a result, the catalogues have been indexed only for general subjects (enthroned deities, goddesses, Archaic; kourotrophoi; busts; and so on) and for references to specific sites (at Paestum and at other city-states) where comparable terracottas have been found.
