NOTES ON THE SECOND PRINTING

With this second printing of *Gleason’s Plants of Michigan*, typographical errors have been corrected and page numbers provided in the Group Keys where a line leads to a plant species or family. Some changes have been made in the Group 4 (Dicots) Key for better identification of some families. A Quick Index to Plant Families has been added to the end of the book. Special thanks are due to Dr. James Doyle for suggesting this index and for preparing the first draft.

Additional useful references for aquatic plants:
