CONTENTS

Introduction 1

CHAPTER 1 The Generative Tradition: The Scientific Foundations of the Study of Language 12
  1.1 Behaviorism 13
    1.1.1 The Roots of the Standard Social Sciences Model 14
    1.1.2 Chomsky’s Review of Verbal Behavior 15
  1.2 The Rise of Generative Theory 16
    1.2.1 Complexity and Learnability 17
    1.2.2 The Descriptive and Explanatory Objectives 20
    1.2.3 Constraints on Variables in Syntax 22
    1.2.4 Poverty of Stimulus 26
    1.2.5 The Minimalist Program 30
  1.3 The Adult Language Acquisition Problem 32
    1.3.1 Minimalism and SLA 32
    1.3.2 The Limits of Minimalism 33
    1.3.3 The Critical Period 35

CHAPTER 2 Language Ontogeny: How Languages Develops in the Individual 40
  2.1 The Modular Mind 41
    2.1.1 Brain Pathology and Modularity 42
    2.1.2 Brain Mapping 43
    2.1.3 Brain Disorders 45
  2.2 The Critical Period Hypothesis 46
    2.2.1 Language Loss and Recovery 47
    2.2.2 Language Deprivation 48
  2.3 The Bilingual Brain 49
    2.3.1 Pathological and Non-Pathological Evidence in Bilinguals 50
    2.3.2 Bilingual Brain Mapping 50

What’s Next? 54

CHAPTER 3 Language Phylogeny: How Language Developed in the Species 59
  3.1 The Rise of Twentieth-Century Scientific Thought 60
  3.2 Consilience 62
  3.3 Hominid Genera 64
    3.3.1 Anatomical Markers for Speech 66
    3.3.2 The Early and Late Hypotheses 68
  3.4 Languages in Adulthood 70
