## Acknowledgments

I would like to thank three different research communities for the valuable contributions that they provided to the research presented in this book. Because the very first version of this research project took the form of my doctoral dissertation at Ohio State University, I begin by offering my thanks to Ed Mansfield, David Rowe, Tim Frye, and Eric Fisher for helping me get started on the project and for then keeping me on track. I also thank a fellow student in the field of international political economy (IPE) at Ohio State, Pat McDonald, who provided lots of useful comments on the many drafts of my chapters and papers related to monetary policy divergence among advanced industrial democracies.

My second round of thanks goes to the research community at the University of Pittsburgh, where I began writing this book as an assistant professor. I am grateful to my colleagues in the Department of Political Science, including David Barker, Chris Bonneau, Chuck Gochman, Michael Goodhart, Mark Hallerberg, Anibal Perez-Linan, Sebastian Saiegh, Dan Thomas, and Tony Walters for substantive and methodological comments or suggestions that found their way into the manuscript. In particular I also thank Nita Rudra, who volunteered to read multiple drafts of the manuscript. Her insightful feedback led me to restructure my arguments in an effort to reach a broader IPE audience.

My third research community is the ever-expanding set of scholars devoted to international and comparative monetary politics. For instructive comments on these topics, as well as for setting professional examples that I have deliberately tried to imitate, I thank Bill Bernhard, Lawrence Broz, Bill Clark, Mark Hallerberg, and Jerry Cohen. I also offer sincere thanks to Jonathan Kirshner and Eric Helleiner, who organized a workshop devoted to the manuscript for this book in November 2005 at Cornell University. I feel honored that so many

prominent scholars, including Phil Cerny, Kate McNamara, Layna Mosley, Lou Pauly, Chris Way, and Michael Webb, attended and offered their criticism and suggestions for improving the manuscript. I have not been able to follow all of their advice, but I hope that this book is much improved as a result of trying.

Finally, I offer my genuine thanks to two anonymous reviewers for their helpful and encouraging comments about this book's manuscript and to Jim Reische, who shepherded me through the peer review process for the University of Michigan Press. I am honored to be associated with the series Michigan Studies in International Political Economy, which has published some great books on the topic of monetary politics.

Deborah Patton built the index for this book, and her work was supported by a grant from the Richard D. and Mary Jane Edwards Endowed Publication Fund at the University of Pittsburgh.
