---

This in-depth study of saving in low-income households is part of the American Dream Demonstration (ADD), an experimental test of Individual Development Accounts. The CFED designed and implemented ADD, while the Center for Social Development (CSD) designed and led the research agenda. Our gratitude goes to the twelve foundations that provided support, including The Ford Foundation, Charles Stewart Mott Foundation, Joyce Foundation, F. B. Heron Foundation, John D. and Catherine T. MacArthur Foundation, Citigroup Foundation, Fannie Mae Foundation, Levi Strauss Foundation, Ewing Marion Kauffman Foundation, Rockefeller Foundation, Metropolitan Life Foundation, and Moriah Fund.

We are also grateful to the host organization, Community Action Project (CAP), of Tulsa, Oklahoma, for facilitating the interviews. Throughout, the executive director, Steven Dow, and the dedicated staff at CAP, including Jennifer Robey, Rachel Trares, Virilyaih Davis, Kimberly Cowden, and Leisa Crawford, provided support and assistance in recruiting respondents, clarifying program guidelines, and keeping track of program and participant information that helped inform our research. Their contributions made this study possible.

From the start, this study has been a team effort. First, we express our appreciation to the entire in-depth interview research team. The project's talented interviewers, Shannon Collier-Tennison, Philip Rozario, Trina Williams Shanks, Fred Ssewamala, Rebecca Vonderlack-Navarro, and Michal Grinstein-Weiss, not only engaged respondents in in-depth conversations about their financial lives and saving but also provided extensive comments and helpful suggestions regarding interpretation and analysis. Throughout, Lissa Johnson at the Center for Social Development kept the project going, managing analysis and savings data, supervising human subjects reviews, and making valuable contributions to qualitative data analysis. Thanks also to Philip Hong who contributed to the interview instrument. Julie Bliss carefully transcribed the interviews. Jami Curley checked transcriptions and profiles for accuracy. Suzie Fragle provided helpful assistance throughout the interview process, including

organizing correspondence with research participants. Ella Boyd ably managed interview tapes and correspondence.

Stacie Hanson played a key role in analysis. She listened to all the interviews, created case profiles, and extracted vignettes of key cases; but more important, she conducted thoughtful analyses that inform this volume. Fred Ssewamala carefully reviewed qualitative files and contributed to qualitative analysis. Trina Williams Shanks analyzed the effects of saving on children's welfare. Mark Schreiner provided data and analysis from other parts of ADD research. Kwofie Danso and Chang-Keun Han also helped with quantitative analysis of monitoring and survey data. Beatriz Castaño helped to organize and categorize the data, Catherine Sherraden extracted expense data, and Shelby Schroeder, Lisa Waddell, and Jason Wead extracted data from the interviews. We are grateful to each for their help.

Deepest appreciation also goes to the editorial team beginning with Julia Stevens who supervised the editorial process, edited the entire manuscript, and improved clarity. Luisa Leme and Wei Chang checked references and calculations, and Carrie Freeman made the manuscript look right. Lissa Johnson, Margaret Clancy, Michael Sherraden, Rajiv Prabhakar, and two anonymous reviewers read the manuscript and offered constructive and helpful suggestions. Sondra Beverly gave extensive guidance on revisions during the final stage of editing, making the volume conceptually cleaner and more concise. Amanda Moore McBride managed data collection, including supervising the research team and support staff, conducted quantitative analyses, and provided advice during analysis and writing. Margaret Sherraden led research design, analysis, and writing.

Over the years, many people have enhanced our thinking about saving and financial decision making in low-income households, including Deb Adams, Ray Boshara, Kathy Edin, Willie Elliott, Bill Emmons, Steve Fazzari, Bob Friedman, Jeanne Hogarth, David Lander, Duncan Lindsey, Howard Karger, Julian LeGrand, Annamaria Lusardi, Yves Moury, Yunju Nam, Melvin Oliver, Shirley Porterfield, Will Rainford, Mark Rank, Herb and Irene Rubin, Cynthia Sanders, Ed Scanlon, Mark Schreiner, Tom Shapiro, Michael Sherraden, Fred Ssewamala, David Stoesz, Carolina Trivelli, and Min Zhan. We thank each of them.

This book would not have been possible without Camille, Anne, Tonya, Ella, Becky, Fred, LaVonne, Debra, Heather, Theresa, Cynthia, and the others in the study who allowed us to learn about their families' financial lives. Although the book is about the ostensibly rational topic of savings, it is in reality a com-

plex and often emotional matter. The credit for insights into saving in low-income households explored in this book goes to them.

Amanda would like to dedicate this book to Lewis and Eula Bracy, her maternal grandparents, who never had much materially but pinched their pennies—in many of the same ways discussed in this book—which led to the down payment for her first house.

Margaret thanks Michael, Catherine, and Sam for their love and encouragement, and dedicates this book to her parents, Connie and Tom, who didn't teach us about money, but taught us about people.
