

List of Contexts and Dating Material from the House of Diana  
Adam Rabinowitz

US	Identification	Phase	Date of coins	Date of latest datable ceramic
0	topsoil	8	211-150 BC; AD 137	
1	abandonment in forum trench	7		
2	pavement of Roman forum portico	3?		
3	Severan walling across forum façade of house	6		
4	late use surface of forum	6-7?		
5	later archaeological trench following line of forum gutter	8		
6	resurfacing of beaten-earth floor of forum	3?		
7	abandonment	7	300-268 BC; AD 22-30	
8	disturbed pisé collapse in atrium, rm E	7		
9	material on floor of rm E	4		1 <sup>st</sup> -2 <sup>nd</sup> c. AD
10	collapse of walls of sunken-floor building in collapse of shop D	7	211-150 BC	
11	signinum floor of rm E	3a		
12	wall between atrium and rm E; one of two doors blocked	1		
13	signinum floor of atrium	3a		
14	plaster fall on atrium floor	5		
15	articulated pots (on floor of atrium)	4		
16	signinum pavement of shop D	1 or 3		
17	cut for sunken-floor building in collapse of shop D	7		
18	stony packing around sunken-floor building in collapse of shop D	7		
19	last beaten-earth floor of shop D	3a	211-150 BC	Augustan (ceramic)
20	posthole cut for modern fence in area of shop D	8		
21	posthole cut for modern fence in area of shop D	8		
22	disturbed collapse in N half of rm F	7		
23	SE external wall of house, shared with AB VI	1		
24	wall between rm E and rear of shop C	1		
25	wall between shop C and fauces	1		
26	wall between shop D and fauces	1		
27	impluvium molded in signinum pavement of atrium, bonding with main cistern drawshaft	3a		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
28	crude wall, now removed, in plastered earth and stones, originally enclosing impluvium but later destroyed on two sides by later intrusion; sat directly on surface of pavement of atrium	4		
29	L-shaped cut stone set into atrium floor at corner of shop C and fauces; probably meant to prevent runoff into foundations	3a		
32	wall of Severan granary, built in slit-trench cutting through walls and destruction layers of house	6		
33	NW external wall of house, dividing house space from forum entrance to NW	1		
34	wall between shop D and rm F	1		
35	signinum floor of rm F	1?		
36	wall between rms F and G	1		
37	crude dividing wall built against earlier walls and over floor of rm F	4		
38	roughly circular cut in floor of rm E - planting pit?	7?		
39	fill of modern postholes in area of rm D	8		
40	collapse in area of rm C, disturbed by agricultural activity	7		
41		1		
42	blocked doorway in wall 12 to earlier cubiculum in area of rm E	3a		
48	mosaic pavement of shop C	3a		
49	wall between atrium and rms F, G	1		
51	posthole cut	8		
52	fill of cut 51	8		
53	temporary hearth or campfire	8		
54	spoil tip	8		
55	spoil tip	8		
56	spoil tip	8		
57	posthole cut in 56	8		
58	fill of 57	8		
59	earlier archeological sondage	8		
60	backfill for 59	8		
61	loose earth filtered down between hollows in pile of stones covering cistern	7		
62	midden tip filling cut 65 and part of cistern	7	AD 119-138	AD 100-300 (undocumented early medieval)
63	lower layer of midden fill	7		
64	pilaster or roof pier, fallen face-down in collapse of wall 49	5		
65	late cut through collapse of G and atrium, probably intended to open cistern for ag. activity or as ditch to drain water into cistern	7		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
66	upper fill or sediment in main cistern	5-7		
67	upper fill or sediment in main cistern	5-7		
68	upper fill or sediment in main cistern	5-7		
69	upper fill or sediment in main cistern	5-7		
70	cistern of Roman house	1		
72	sediment deposited in last phase of cistern use	5-7		
73	skeleton of murder victim	7		
74	collapse of Roman pisé walls in rm G	5		
75	collapse of Roman pisé walls in rm H, disturbed by ag. activity 97	7		135-10 BC
76	collapse of Roman roof over W half of house	5		200-100 BC
77	intact wall plaster collapse from one of walls of rm H	5		
78	pisé of atrium & rm E, disturbed by later agricultural activity (plowing etc.)	7		
79	backfill for Brown's wall sondage, S corner of 95 trench	8	AD 41-50	
80	pisé fall covering large collection of articulated sherds just over atrium floor	4		AD 80-250
81	soil corresponding to 80 but contaminated by Brown's sondage	8		
82	beaten-earth floor of service rm I	4	illegible Republican	200-100 BC
83	cocciopesto pavement of service rm O	3a		
84	doorway w/worked stone sill in wall 12	1		
85	spoil tip or cement-making leftovers	8		
86	stone sill, contemporary with resurfacing of atrium, dividing atrial space from ala service space	3a		
87	original Repub. wall of cubicula on SE side (later rm E)	1		
88	original Repub. wall between first 2/3 of house and tablinum, service, oecus space	1		
89	possible second phase wall, setting service rms O and L off from access corridor M	3a		
90	original Repub. wall setting rm G off from ala H	1		
91	original Repub wall, corresponding to 88; sets back 1/3 of house off from rest	1		
92	layer of fill/sediment in main cistern	4-5	AD 41-50	
93	layer of fill/sediment in main cistern	4-5		
94	Neronian mosaic paving for tablinum	4		
95	secondary phase decorated paving of ala H	3a		
96	primary phase pavement of cubiculum G	1		
97	disturbance of pisé collapse by later agricultural activity	7		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
98	pisé collapse disturbed by later agricultural activity in garden plot 97	7		
99	pisé collapse disturbed by later agricultural activity, possible associated with 97/98, 65,	7		
118	signinum pavement in corridor behind shop C	1 or 3a		
126	thin wall between shop C and rear corridor	3a		
130	disturbed pisé collapse from walls of corridor M; located in M	7		200-150 BC
131	remains of roof and wall collapse in service rm O, disturbed by later ag. activity and then by later archeology	8		200 BC-AD 50
132	pavement of fauces, contemporary with second phase atrium floor	3a		
133	abandonment layer present in rm K, possibly the same as 7	7		
134	later disturbance of pisé collapse in rm J	7		
135	probable undisturbed pisé collapse in rm J	5	234-231 BC	
136	later disturbance of pisé collapse in rm J	7		
137	also agricultural disturbance, maybe compounded by root disturbance	7		
138	deep topsoil filling cut 139	7		
139	attempted olive planting pit?	7		
140	probable undisturbed pisé collapse of walls of corridor M	5	211-150 BC	AD 50-150
141	second-phase beaten-earth floor of corridor to service rms	3-4		AD 65-75
142	pisé collapse of walls of rm K, disturbed by later ag. activity	7		1 <sup>st</sup> -2 <sup>nd</sup> c. AD
143	filling of cut 147 (natural or intentional?) at later date	7		
144	wall and roof fall in rm K	5		
145	disturbance of house collapse in fauces by later agricultural activity	7		
146	remnants of undisturbed pisé collapse in fauces	5	AD 64-66	
147	cut forming an irregular ditch through W part of atrium	7		
148	attempt at olive planting pit at threshold of fauces	7		
149	intentional backfill of cut 148 with very large stones	7		
150	backfilling or pisé above tile floor in shop C cesspit (177)	3a-5		
151	Neronian mosaic flooring of rm K	4		
152	probably fill of 147, like 143	7		
153	piece of mortared brick column from garden peristyle of house reused in grave 251	7		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
154	pots left on floor or fallen from wall in rm F, post abandonment of house	4		AD 65-75
155	residue of final-phase pisé collapse, fallen on top of pots left on floor in F	4		AD 41/54-100
156	one of four posthole cuts for piece of furniture in rm G, slightly off alignment of mosaic "rug"	1 (or 3-4?)		
157	wall and roof collapse in S corner of house, churned up by agricultural activity?	7		135-10 BC
158	plow-disturbed collapse in rm O	7		
159	layer of abandonment in rm P	7		
160	collapse of walls of shop D disturbed by later agricultural activity	7		AD 80-90
161	possibly upper levels of battuto 19 in D	3a		
162	probably parts of battuto 19 left covered by 160 when 17 cut	3a		
163	pisé and roof collapse of Roman phase, more or less in situ in rm P	5		
164	disturbed collapse of Roman house in service suite	7		70 BC – AD 15
165	(failed?) olive planting pit in rm P	7		
166	fill of planting pit 165	7		AD 98-138
167	pisé collapse in situ in shop D	5		
168	remnants of pisé collapse in situ in rm F, N half	5		
169	piles of ash representing dumped bucketfuls of cinders in S corner of D	1		
170	possible traces of burnt furniture in rm F	5		
171	beaten-earth patching for deteriorated parts of pavement 35 in F	4		
172	posthole, possibly for some sort of furniture support	3-4		
173	door pier or pilaster fallen face down on atrium pavement; corresponds to 64, but NE side of door in 49	5		
174	part of beaten-earth floor of shop D	3a		
175	small, uninterpretable cut around middle of 174 in W corner of shop D	3-4		
176	fill for 175	3-4		
177	cesspit for Repub. phase of shop C	1		
178	cesspit for Repub. phase of shop D	1		
179	final-phase beaten-earth floor of rm P	3a		1st c. AD
180	posthole in corner of 83 -- modern	8		
181	fill for 180	8		
182	possible olive planting pit in rm L, next to wall 184	7		
183	backfill of cut 182	7		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
184	original wall of service rm L, or later wall built along same lines	1 or 3a		
185	earlier phase cocciopesto floor for service rm L	1		
186	secondary phase paving of service rm L	3a		
187	secondary phase wall of service rm P	3a		
188	dividing wall, possibly kneewall, setting puteus O off from rm L	3a		
189	possible base for mudbrick stove/oven in P	3a		
190	original phase wall of rm J, partially reconstructed	1		
191	secondary phase wall blocking J off from back of house	3a		
192	wall added in secondary phase, extending NW wall of M towards back of house	3a		
193	secondary phase wall enclosing, w/192, new rm behind J, leaving entrance to oecus K	3a		
194	primary phase wall between rms J and K	1		
195	secondary phase floor in Q, K	3a		
196	preparation for worked stone sill of fauces (robbed after abandonment)	3a		
197	drain for excess water from atrium or impluvium, leading into forum	3a		
198	one of four posthole cuts for piece of furniture in rm G, slightly off alignment of mosaic "rug"	1 (or 3-4?)		
199	one of four posthole cuts for piece of furniture in rm G, slightly off alignment of mosaic "rug"	1 (or 3-4?)		
203	one of four posthole cuts for piece of furniture in rm G, slightly off alignment of mosaic "rug"	1 (or 3-4?)		
204	secondary phase sill between fauces and vestibulum, later robbed	3a		
205	blocking of doorway between rm H and rm K	3a		
206	base for secondary phase counter or stairs at back or shop D	3a		
207	doorway in 26, communicating between shop C and stairwell; cut into 118 and molded into 48	3a		
208	disturbed pisé fall in shop D between 32 and 30	7		
220	early-phase beaten-earth floor for corridor M	1		
221	destruction of wall 191	5		
222	layer of abandonment (=7)	7		mid-2nd – 4 <sup>th</sup> -5 <sup>th</sup> c. AD
223	fill (?) related to late activity in area of the garden	7		AD 400-500
224	fragment of a female herm, probably associated with the decoration of the shrine - now subsumed	5		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
	in 240			
225	fill of robber trench along 237	5-7		
226	cut for robbing of worked stone from 237	5-7		
227	decorative elements from the garden found piled in aedicula	5		
230	main structure of aedicula (cella, walls)	4		
231	wall closing off rm K to garden and absorbing earlier colonnade	3b		
232	fill of robber trench along 237 to the S	5-7		
233	robber cut taking worked stone from S part of 237	5-7		
234	wall between corridor R and rm N	3a		
235	wall between rm N and rm S	1		
236	first-phase cocciopesto pavement of rm S	1		
237	first-phase wall of rear of house	1		
238	fill of robber cut taking blocks from 237	5-7		
239	robber cut to take blocks from 237	5-7		
240	collapse of shrine (230)	5-7		AD 330-410
241	altar for shrine	4		
242	undisturbed pisé collapse in garden, probably from destruction of 237	5		AD 100-300
243	plaster floor of the shrine in the garden	4		
244	colonnade/loggia between rms K, Q and garden; later absorbed by 231	3a		
245	undisturbed pisé collapse in rm N	5	AD 75	2 <sup>nd</sup> ½ of 2 <sup>nd</sup> c. AD
246	pisé in rm K disturbed by 7th c agricultural activity	7		
247	preparation for beaten-earth floor in shop D	3a	211-150 BC (coin)	
248	equals 251	7		
249	leveling for beaten-earth preparation in shop D	1		
250	also leveling for beaten-earth preparation in shop D	1		
251	built grave (medieval?) in W corner of rm K	7		
252	fill of grave 251	7		
253b	body in grave 251	7		
254	hypothetical cut of agricultural disturbance of pisé in '96 part of rm K	7		
255	more levelling for beaten-earth preparation of shop D	1		
259	fragment of architectural frieze in 252	7		
260	uppermost layer of cesspit fill in shop D	2a	211-150 BC	2 <sup>nd</sup> c. BC
261	next layer down in shop D cesspit fill	2a		
262	fill of robber cut 263	5-7		mid 2 <sup>nd</sup> -mid 3 <sup>rd</sup> c.

US	Identification	Phase	Date of coins	Date of latest datable ceramic
				AD
263	robber trench between rm Q and the garden	5-7		
264	yellow-mortar pluteus separating space of rm Q from the back garden	4		
265	bottom layer of pisé collapse in cesspit in shop C	3a		2 <sup>nd</sup> c. – 50 BC
266	upper layer of the intentional fill of the cesspit in shop D	2a		Augustan – 2 <sup>nd</sup> c. AD
267	tile pavement over filled-in cesspit in shop C	2a		
268	possible drain for secondary, puteal use of filled-in cesspit of shop C; may also be a natural feature	2a?		
269	more highly organic level of single fill in cesspit of D	2a		225-135 BC
270	collapse of staircase in W corner of garden	5		
271	fill of cesspit of shop C	2a		135-10 BC (single 1 <sup>st</sup> -3 <sup>rd</sup> AD probably contamination)
272	Augustan wall between rms N, S and garden	3a		
273	sediment from Republican-phase use of cesspit in shop D	2a		
274	original act of cutting cesspit in shop D (178)	1		
275	collapse of wall 231, falling back into the garden	5		AD 100-300
276	in situ collapse of pisé in rm Q	5		
277	equals 271	2a		
278	uppermost layer of latest garden surface (equals 349)	5		2 <sup>nd</sup> ½ of 2 <sup>nd</sup> c. AD
279	cut for fountain (later decorative nymphaeum) in wall 237 in garden	2a		
280	wall in front of the nymphaeum or niche in the rear wall	2a		
281	collapse of some part of the structure represented by 279/80	5		Sigillata italica
282	possible collapse of interior decorative elements of 279	5		AD 100-225
283	collapse disturbed by later plowing or pit-digging in rm P	7		
284	lower layer of collapse disturbed by agricultural activity in rms P, M	7		
285	portion of collapse of wall 237 in area of niche	5		late 1 <sup>st</sup> to early 2 <sup>nd</sup> c. AC
286	sediment from Republican use of cesspit in shop C	2a		
287	original act of cutting cesspit in C (177)	1		
288	collapse of 231 disturbed by large olive root along wall 33	5		AD 80/90-160
289	architectural fragment found in 288 (subsumed in 288)	5		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
290	secondary cistern under rms R and N in rear of house	1		
291	top of midden fill of rear cistern	3a		3 <sup>rd</sup> ¼ of 1 <sup>st</sup> c. BC
293	architectural fragment found in 301 (subsumed in 301)	5		
294	fill of cut or depression in the bedrock between rm S and wall of garden	4	AD 41-50	AD 50-250
295	remnants of in situ pisé collapse in rm P and M (96 exc.)	5		
296	yellow-mortared stairs to street in W corner of garden	4		
297	third-phase gutter in worked stone along edge of pavement of rms K, Q	3a		
298	doorsill of entry to shrine, postholes on each side for screen or gate	4		
299	front part of podium and stairs up to shrine (lighter const. than 230)	4		
300	part of 240 disturbed by root action, like 275/288	5		1 <sup>st</sup> ½ of 2 <sup>nd</sup> – 4 <sup>th</sup> - 5 <sup>th</sup> c. AD
301	layer of destruction of opus sectile decoration on floor/ walls of niche 279	5		
302	reused column base in garden in front of shrine	4		
303	cocciopesto floor of corridor R with opening to rear cistern	1 (or 3a?)		
304	wall-stub with half-column at SE end of loggia	3a		
305	wall between corridor R and rm P	3a		
306	sill between M and R (possibly reused foundation of earlier wall)	3a (or 1?)		
307	doorsill of entry from M into rm P	3a		
308	NE wall of whatever structure is created by bedrock cuts between S and 272	1		
309	cut or depression in bedrock between rm S and wall of garden	1		
311	collapse (?) filling cut for sunken-floor building at SW end of garden	7		mid 2 <sup>nd</sup> – mid 3 <sup>rd</sup> c. AD
312	foundation cut for sunken-floor building at SW end of garden	7		
313	posthole cut for one of poles of sunken-floor building at SW end of garden	7		
314	fill of 313	7		
315	posthole cut for pole of sunken-floor building at SW end of garden	7		
316	fill of 315	7		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
317	makeup of 1st-phase cocciopesto pavement of rm P, thrown up when drain to cesspit dug and then becoming part of later beaten-earth surface for that rm	3a		200-100 BC
318	fill of cut (?) associated with sunken-floor building at SW end of garden	7		late 5 <sup>th</sup> c. AD
319	fill of 320	7		
320	posthole cut for pole of sunken-floor building at SW end of garden	7		
321	intentional fill of drain or rough impluvium in rm P to create new floor level	3a		
322	spoil thrown up in creation of foundation for lean-to, then packed in along edges to support lean-to walls	7		end of 1 <sup>st</sup> – beginning of 2 <sup>nd</sup> c. AD
323	spoil thrown up in creation of foundation for lean-to, then packed in along edges to support lean-to walls	7		
324	cut associated with sunken-floor building at SW end of garden (?)	7		
325	possibly remnants of a preparation layer for the secondary pavement of rm L	3a		
326	collapse of roof, ceiling, and wall plaster of rm Q	5		135-10 BC
327	earliest cocciopesto pavement in area of rms P, R	1		
328	makeshift impluvium or wastewater drain for water from basin in rm L	2a		
329	filling in of early basin in rm L	3a		100 BC – AD 14
330	lower level of packing for later doorsill of door in wall 23 at end of R	3a		
331	collapse of section of wall 237 with different makeup than rest of collapse	5		AD 80-250
332	rough basin for washing or wastewater cut into floor in area of rm L	2a		
333	backfill of late cut	5-7		Severan – early 5 <sup>th</sup> c. AD
334	late cut through destruction levels in E corner of garden	5-7		
335	part of pisé collapse subsided in area between bench and stone, slightly different composition than rest of collapse	5		
336	earliest collapse of aedicula – probably material eroded from stairs	5		early 2 <sup>nd</sup> – 4 <sup>th</sup> -5 <sup>th</sup> c. AD
337	silt created by erosion of wall collapses along edges of garden into depression in center	5		AD 75-150
338	collapse of yellow-mortared curtain wall between rm Q and garden	5		
339	preparation for 1st-phase pavement of rm L	1		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
340	pieces of decoration of the fountain, incl. most of a surface in opus sectile, either collapsed naturally or thrown down beside it	5		
341	probably overexcavated, slightly more friable part of 349	5		
342	lower layer of collapse of wall between rm Q and garden	5		
343	more-disturbed collapse of pisé walls of rm N	7		Augustan – early 2 <sup>nd</sup> c. AD
344	fill for small hole (345) cut in last garden surface	5		1 <sup>st</sup> – early 2 <sup>nd</sup> c. AD
345	small hole cut in last garden surface	5		
346	backfill for sample trench from earlier archaeological campaign	8		
347	sample trench dug during an earlier archaeological campaign	8		
348	final-phase cocciopesto paving of rm N	4		
349	beaten-earth use surface of garden in phase of temple and stairs	5		AD 100-300
350	bottommost layer of pisé collapse in rm N	5		AD 1-200
351	originally thought garden surface, but probably lowest layers of 278, left from previous season of excavation	5		mid 2 <sup>nd</sup> – mid 3 <sup>rd</sup> c. AD
352	cubilia from Augustan pavement used as preparation for Julio-Claudian pavement and fill for earlier cistern drain	4		AD 0-250
353	charcoal and tile fill of hole in floor of N (368)	5		
354	organic decay filling hole (355) in last-phase garden surface	5		
355	natural hole in last-phase garden surface, caused by root action?	5		
356	backfill of planting pit or robber cut (357) in rm Q	5-7		
357	post-collapse cut for planting or robbing in rm Q	5-7		
358	fill of 362	5		
359	fill of 363	5		
360	fill of 364	5		
361	fill of 365	5		
362	cut in last garden surface, filled with burnt/organic material	5		
363	cut in last garden surface, filled with burnt/organic material	5		
364	cut in last garden surface, filled with burnt/organic material	5		
365	cut in last garden surface, filled with burnt/organic material	5		
366	fill of 367	5		
367	cut in last garden surface, filled with burnt/organic material	5		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
368	three contiguous circular cuts or holes in floor of rm N, probably natural	5		
369	Augustan-phase garden soil in northern 2/3 of garden	3a	7 BC	Flavian – 2 <sup>nd</sup> c. AD
370	Augustan beaten-earth surface along SE and SW walls of garden	3a		Augustan - Tiberian
371	mortar splashes from construction of wall 231, trampled into primary Augustan use surface of garden	3b		
372	last Repub. garden surface with planting trench/irrigation ditch	2a		135-10 BC
373	collapse of wall across the town road to the SW of the house	5		10 BC – AD 150
374	intentional fill or sedimentation of Republican irrigation ditch	2a		200-150 BC
375	planting or irrigation trench? linear feature cut into Repub. garden soil	2a		
376	backfill of large hole 419 dug into rm Q	5-7		
377	more rocky soil used to fill hole 419	5-7		
378	mortar preparation for opus sectile surface in later phase of niche 279	4		
379	fill of fountain basin to prepare for conversion to decorative niche	4		Augustan - Neronian
380	midden material filling cesspit in back of house	3a		1 <sup>st</sup> c. BC
381	fertilized planting soil for Repub.-phase plantings near fountain	1		200-100 BC
382	rocks used during construction of fountain to fill depression left by previous plantings in area	2a		
383	calcium precipitates from bedrock of fountain drain	2a		
384	planting soil filling 385	3a		
385	planting cut in garden lined with stone and tile	3a		
386	compost or fertilizer heap for Repub. phase garden	1		
387	planting cut for small plant/shrub in Repub. garden phase	1		
388	planting cut for small plant/shrub in Repub. garden phase	1		
389	bottom of planting hole for very small plant	1		
390	planting hole under corner of fountain for pre-fountain Repub. phase (or perhaps connects to fountain drain as passive watering conduit)	1		
391	planting cut for first-phase Repub. garden	1		
392	earliest deposit of garden soil	1		2nd c. BC

US	Identification	Phase	Date of coins	Date of latest datable ceramic
393	linear trace of burning or organic decay on last Repub. garden surface, possibly burnt beam from destruction of 70 BC	2b		
394	linear trace of burning or organic decay on last Repub. garden surface, possibly burnt beam from destruction of 70 BC	2b		
395	early-phase garden soil cut into earliest soil (392)	2a		200 BC – AD 50
396	leveling fill of shallow foundation trench for construction of gutter 297	3a		
397	foundation trench for construction of gutter	3a		
398	planting soil at corner of fountain, possibly later filled in with rocks to support edge of structure; fill of 399 and 401	2a		
399	planting pit at corner of fountain, later filled with rocks to enable construction of fountain (280)	1		
400	BEDROCK			
401	planting cut at corner of fountain, associated with larger cut 399	1		
402	fill of 408 - hard soil, little evidence of organic decay	2a		
403	heavier rear cesspit waste from use pd., forming sediment left in settling pit	2a		
404	fertilized planting soil filling planting cut 401	1		
405	fill of hole 420 in rm Q	5-7		Sigillata italica
406	area of gutter construction-trench fill containing jug, most rocks	3a		
407	wider part of foundation cut for gutter, intact jug inserted for levelling	3a		
408	cut for post or stake in 395	2a		
409	fill of 410 - hard soil, little evidence of organic decay	2a		
410	cut for post or stake in 395	2a		
411	fill of midden pit 413 in early phase of garden	2a		70-30 BC
412	either leveling soil for preparation of garden, or charcoal remnants from the firecracking of the bedrock during the initial construction of the garden	1		
413	pre-existing cut in 395 filled with refuse, or pit dug for purpose of disposing of organic and ceramic waste	2a		
414	fill of 415	1		200-100 BC
415	Repub. planting pit (?)	1		
416	fertilized planting soil from early Repub. garden plantings filling 417 and 418	1		
417	planting cut from early Repub. garden	1		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
418	early Repub. planting pit, cut by later Repub. phase addition of planting soil 395	1		
419	regular, circular robbing cut or planting pit through destruction and floor of rm Q	5-7		
420	regular, circular robbing cut or planting pit through destruction and floor of rm Q	5-7		
421	original cut in bedrock for cesspit or waste-water drain serving bath rms in back of house	1		
422	pit for compost cut into garden soil 392 in Repub. phase	1		
423	fertilized planting soil for planting pit 424 in early Repub. garden	1		200-120 BC
424	planting cut associated with 1st-phase Repub. use of garden	1		
425	intentional fill of early drain of gutter in E corner of garden?	1?		200-150 BC
426	levelling for Aug. construction surface in E corner of garden?	3a		
427	possibly a lower level of fill in one of the round cuts in 195, in rm Q - but no documentation	5-7?		
428	Repub. cocciopesto pavement for rm N, connecting to drain	1		
429	massive doorsill for door between rm N and garden, cut through wall 272	4		
430	roughly-built step up from garden to rm N doorsill	4		
431	preparation for Aug. phase opus spicatum doorsill between house and service court (former AB VI)	3a		
432	depression under burnt beam (?) 394 - may just be overexcavation	2b		
433	secondary Repub. cut to lay down better garden soil, probably for kitchen garden rather than trees - filled with 395, 372	2a		
434	organic decay or burning associated with compost heap - destruction material?	2b		
435	bench or shelf built against garden side of wall 272	4		
436	early drain for gutter, robbed out and filled in in later garden phase?	1?		
437	Augustan-phase doorsill for door between rms R and Q; visible only in tile preparation; probably originally a worked stone block, robbed in antiquity	3a		
438	robbing of doorsill 437 in antiquity, before the collapse of the house	5		
439	large worked block set in garden surface parallel to 272/bench in S corner of garden	4		

US	Identification	Phase	Date of coins	Date of latest datable ceramic
440	doorsill for rm L in Augustan reconstruction	3a		
441	cut to create drain pit for latrine or bath, connected to and draining into rear cesspit	1		
442	1st-phase Repub wall for bath or latrine; its construction includes the partial capping of the latrine pit, and the terracotta channel into that pit	1		
443	last phase doorsill between corridor M and rm N, set higher than other sills to accommodate higher level of final-phase pavement of N - or door blocking?	4		
444	preparation for a later-robbed sidewalk between house and street behind it (to SW)	?		
445	cubilia pavement of rm N, respecting line of 442 and continuing to use drain for water disposal; in late phase torn up and use as fill and preparation for 348 (as fill, designated 352)	2a(?)		
446	fill of 447	3a		
447	Augustan-phase planting pit for small plant, cut into 369?	3a		
448	fill of 449	3a		
449	Augustan-phase planting pit for small plant, cut into 369?	3a		
450	original wall between bath/latrine complex and garden, on line of 272	1		
451	other end of irrigation trench in 372 (non-contiguous with 375)	2a		
452	fill of 451	2a
